Okaloosa County School District Proposed Operating Budgets

General Fund – District Departments & Selected Projects And Debt Service Funds

Fiscal Year 2006-2007

The Superintendent herewith respectfully submits proposed budgets for General Fund - District Departments and Selected Projects, as follows:

GENERAL FUND

Comparison of Estimated Revenue
Summary of Proposed Appropriations
Detail Budgets for District Departments
Detail Budgets for Projects Funded from General Fund Unrestricted Fund Sources, Fees,
and Transfers from Capital Improvement Fund

DEBT SERVICE FUND

Summary of Estimated Revenue and Proposed Appropriations Detail Estimated Revenue and Proposed Appropriations by Fund

Please note that this book does not include projects which are primarily at schools or projects which are currently funded through grants and other sources that are budgeted as received. Projects which are primarily at schools will be included in the *Draft* School Performance Plan Books, as well as a list of projects which will be budgeted as grants and/or funds are received. The *Draft* School Performance Budgets will be submitted to the School Board on July 6, 2006.

Revenue Assumptions

The major source of funding for the Okaloosa County School District is the Florida Education Finance Program (FEFP) and District School Taxes. The revenue to be provided to Okaloosa County through the State school funding program (FEFP) for FY 2006-2007 has not been finalized because the Legislature did not convene until after the District began the budget process. The budget process began in February 2006. The Legislature convened March 7, 2006, and the last day of the legislative session is scheduled to be May 5, 2006.

The Governor's Proposed Budget for fiscal year 2006-2007 as of February 2006, is the basis for projected FEFP revenues. Other federal, state and local revenues are based on current information regarding the fund source and historical revenue data. Estimated revenue for certain programs (Florida First Start, Full Service Schools, Charter School – Capital Outlay, and fee

related revenues) is not projected because the program is not currently funded, the estimated revenue projection is not currently available, or the grant will expire prior to June 30, 2006.

Budget Process

Budget packets were distributed to district departments on January 4, 2006. Departments prepared proposed operating budgets, including staffing, based on services to be provided in FY 2006-2007 and submitted their proposed operating budget to the Budgeting Department for review. Budgeting met with each department and area superintendent to review their proposed operating budgets. During the review, adjustments (increases and decreases) were made to more accurately reflect department needs and the Board's priorities. The Superintendent also reviewed the proposed budgets and made additional changes in the proposed department operating budgets prior to finalization and submission to the School Board. Further changes in department operating budgets may be required prior to the final adoption of the FY 2006-2007 budget due to the following:

- A. Final adoption of the FY 2006-2007 appropriations by the State Legislature;
- B. Changes in statutory requirements; and
- C. Unanticipated changes in major costs for FY 2006-2007, such as termination benefits, property and casualty insurance premiums, workers' compensation, health, dental, life, and other insurance.

Summary of Estimated Revenue

Prior to most other districts doing so, in 2001-2002, the District implemented Equity in School-Level Funding, F.S. 1011.69. The intent of Equity in School-Level Funding is that the funds generated at a school go to the school. Until 2003, the statute required that beginning in 2003-2004, district school boards had to allocate at least 90% of the funds generated by that school based upon the Florida Education Finance Program and the Appropriations Act, including gross state and local funds, discretionary lottery funds, and funds from the school district's current operating discretionary millage levy.

In 2003, the Legislature modified the requirement as follows: "District school boards shall allocate to schools within the district an average of 90 percent of the funds generated by all schools and guarantee that each school receives at least 80 percent of the funds generated by that school based upon the Florida Education Finance Program..." The statute specifically excludes Supplementary Academic Instruction and Class Size Reduction funds from the calculation. Although the statute reduced the requirement on an individual school basis, in 2006 – 2007 the District continues to allocate 91% of the funds generated at a school to the school.

Beginning with this administration's first budget in FY 2001, the Okaloosa School District made substantial reductions in district administrative overhead positions and shifted a substantially greater share of available funds directly to schools. A six-year schedule of those reallocations from district overhead to school operations and classroom instruction is provided herein. Since 2001, the District has steadily decreased district overhead in real dollars and as a percentage of all costs in order to place a greater share of educational resources in schools and classrooms. The

Okaloosa School District operates all district departments and overhead services on 9% of FEFP funding. Florida State University reports that the average district overhead load imposed on schools in other districts in our state is 18%.

Estimated New Revenue for FY 2006-2007 increased \$17.267 million, primarily due to the following:

	\$ Inci	ease (Decrease)
Class Size Reduction	\$	6,911,745
Net Increase in FEFP and District School Taxes		8,599,536
Transportation - FEFP Revenue		696,922
Transportation - Student Activities		75,000
Reading Instruction		266,948
Net Increase in Revenues for Specific Projects		717,239
Net Increase in Estimated Revenues for FY 2005-2006	\$	17,267,390

Estimated <u>Unrestricted</u> New Revenue <u>available</u> for FY 2006-2007 as compared to 2005-2006 2nd FEFP Calculation is as follows:

Net Increase in FEFP and District School Taxes (Unrestricted)	\$	8,599,536
Estimated increase in cost of Florida Retirement contribution		(2,476,664)
Estimated increase in Property and Casualty Insurance		(1,000,000)
FTE in Governor's Proposed Budget vs. School's FTE projection	www.ninge.out.philosome.com/color	(3,614,776)
Estimated Unrestricted New Revenue available for FY 2006-2007	\$	1,508,096

As in 2005-2006, the estimated revenue for Transportation – School Activities (fieldtrips and other transportation services) has been estimated at the current revenue level in order to more accurately reflect actual cost of transportation operations and total estimated transportation revenue. Prior to 2004-2005, Transportation – Student Activities revenue was budgeted when revenues were received rather than as a part of the original budget.

Summary of Proposed Appropriations

Although the negotiated increase in salaries, step and general improvement was approximately 8% in FY 2006, departments throughout the district made adjustments and absorbed costs increases by reducing other parts of their budgets to minimize the overall impact to schools and

the District. Department budgets remain at the 2005-2006 level for all expenditures except fuel and personnel costs. This concerted effort by departments resulted in the overall proposed total appropriations for FY 2007 for departments (net of the \$962,753 increase in Transportation appropriations primarily due to increases in fuel costs and personnel cost) increasing by 6.16% or \$732,295.

The most significant increase in District projects is in Fixed Charges – Project 9015. The Fixed Charges project is used to account for district-wide expenditures for termination benefits, unemployment compensation, property claims expenditures, workers' compensation, property and casualty insurance, attorney fees, independent CPA audit fees, dues and fees, and other related expenditures. The increase in Fixed Charges is approximately \$886,336 and is due to the following:

Increase in termination benefits; Increase in workers' compensation costs; and Increase in property and causality insurance

Cuts in administrative overhead and district downsizing have continued to occur since January, 2001. The cumulative impact of the Superintendent's ongoing administrative downsizing and district office reductions is \$7.6 million in savings, as detailed herein.

These savings have been a principal reason why the School Board has been able to raise employee compensation and maintain services to schools and students without raising tax rates at a time when fixed costs have increased and a substantial share of revenue has been diverted to comply with constitutional class size limits.

The savings generated by these cost reductions in administrative/district overhead are recurring each year and allow a substantially larger share of the education dollar to be appropriated to schools.

If budgets could be compared based on constant (non-inflationary) dollars from year to year, there would be an even more dramatic display of the decrease in the amount and proportion of funds used at the District level. However, the following factors should be kept in mind in analyzing district costs from year to year:

- 1. From FY 2005-2006 to FY 2006-2007, the annual step raise and general improvement raise approved by the School Board and changes in positions, estimated increase in Florida Retirement rate and increase in health care costs increased the overall salaries and benefits for district departments, services, and projects by \$1,103,506. This includes administrative, managerial, instructional and educational support employees working for district departments and projects, not schools.
- 2. Following the downsizing of administrative and overhead costs at the district level accomplished since January, 2001, the total number of employees working in district departments is 497.48. Of these, educational support employees account for 437.00 positions (primarily in transportation and maintenance), and instructional staff at the district level account for 6.00 positions. This leaves only

- 54.48 district-level administrative and managerial employees in all district departments.
- 3. Comparing FY 2006-2007 to FY 2005-2006, the District is expected to earn an estimated \$295,000 more in interest income. This is largely due to an increase in interest rates.
- 4. The attached departmental budgets include a state-mandated Performance Pay Reserve in the amount of \$44,020, which equates to 1% of the base compensation of administrators and instructional personnel working in these departments.
- 5. Due to legislative action, Florida Retirement rates for fiscal year 2006-2007 are estimated to increase to approximately 9.83%. The Florida Retirement rate for fiscal year 2005-2006 is 7.83%. The estimated net FRS rate increase would be 2.00%, which amounts to a state mandated cost increase of \$2,476,664 or an 25.54% increase for a total of \$10,590,156 in required contribution to Florida Retirement.

Other less notable changes are reflected on the summary page of each cost center.

Respectfully submitted,

Don Gaetz

Superintendent
